

SENATE JOINT RESOLUTION 580

By Akbari

A RESOLUTION to designate July 2026 as "Uterine Fibroid Awareness Month" in Tennessee.

WHEREAS, uterine fibroids, clinically known as uterine leiomyoma, are benign tumors in the uterus and the single most common indication for hysterectomy; and

WHEREAS, uterine fibroids grow on or in the uterus and cause heavy menstrual bleeding, debilitating pain, painful intercourse, fetal mortality, and sometimes infertility in women; and

WHEREAS, consequently, uterine fibroids are the leading cause of loss of reproductive potential, and nearly one-half of all hysterectomies are performed to address uterine fibroids; and

WHEREAS, as many as three out of four women will have uterine fibroids during their lives, and up to eighty percent of women will be affected by uterine fibroids by age fifty; and

WHEREAS, uterine fibroids were estimated to cost the United States \$5.9 billion to \$34.4 billion annually, with an estimated annual lost work cost of \$1.6 billion to \$17.2 billion through absenteeism and short-term disability in women ages twenty-five to fifty-four; and

WHEREAS, public awareness and education campaigns on uterine fibroid prevention, screening, and symptoms are held during the month of July each year; and

WHEREAS, the recognition of July 2026 as "Uterine Fibroid Awareness Month" in Tennessee would highlight conversation around the disorder and bring awareness to the issue; and

WHEREAS, public awareness empowers and informs residents of this State about uterine fibroids and encourages earlier diagnosis, more research, and better treatment options and, eventually, will lead to a cure for uterine fibroids; now, therefore,

BE IT RESOLVED BY THE SENATE OF THE ONE HUNDRED FOURTEENTH
GENERAL ASSEMBLY OF THE STATE OF TENNESSEE, THE HOUSE OF
REPRESENTATIVES CONCURRING, that we designate July 2026 as "Uterine Fibroid
Awareness Month" in the State of Tennessee.
